Hine Automation Pursues Reliability Excellence

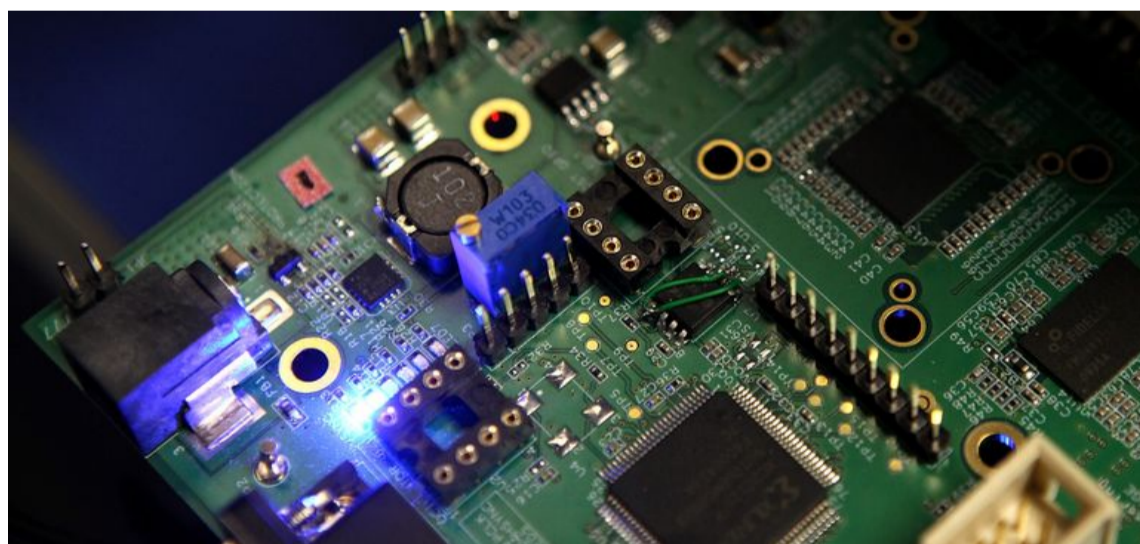

Robot Runs 10 Million Cycles and Counting

The constant pursuit of reliability excellence drives Hine Automation to perform at the highest levels. Hine continues to push the bar with innovation, creativity, education, and solutions critical to its customers' success. Product performance predictability is vital. No surprises. No unplanned downtime. What lies ahead is known.

Setting the precedence of uncompromised quality in design and manufacturing sets Hine apart from other manufacturers. A willingness to push... [Read More](#)

Industry News

Semiconductors expected to be in tight supply throughout 2022

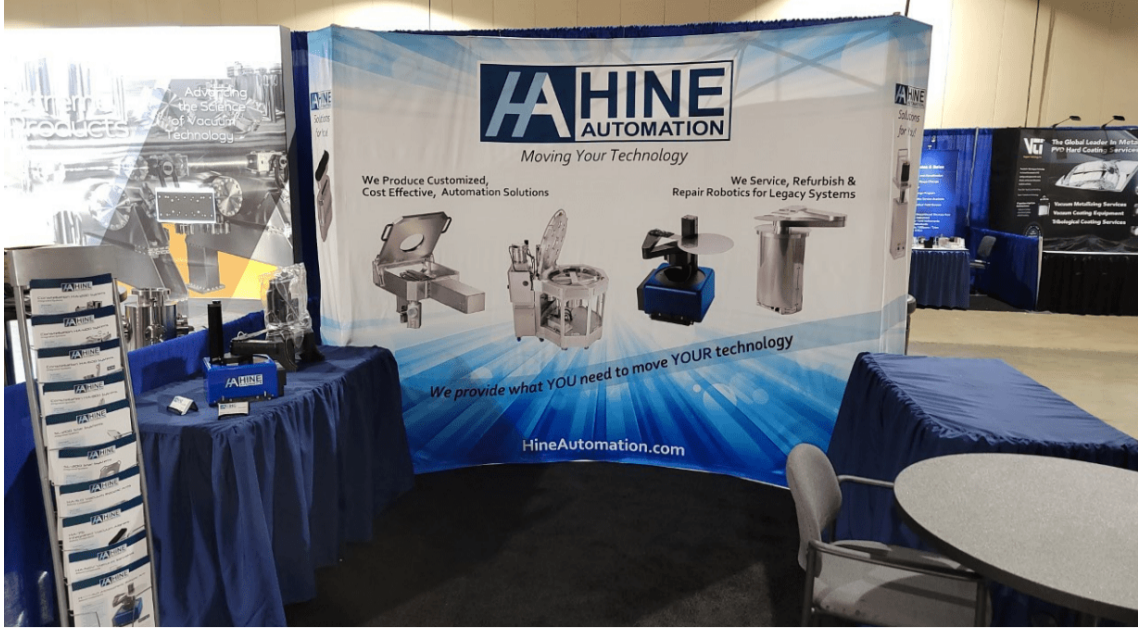

Increasing use of chips in everything from automobiles to appliances means more businesses across industries are competing for limited supply. Suppliers are working furiously to ramp up production, announcing plans for new factories and billions of dollars worth of capital expenditures. [Read More](#)

Introducing: Hine Automation's Evaluation Unit Program

Hine Automation understands Original Equipment Manufacturers (OEMs) need to integrate and evaluate our vacuum components in their systems. We are confident that our products will provide the right solution for your system, and we are happy to offer an evaluation unit. We will make the evaluation unit available for 90 days from the shipment date. At the end of this period, our customers have option to purchase the unit from Hine or to return the unit back to us without charge.

If you are interested in participating in our product evaluation program, please [click here](#).

TechCon 2022: Catching up after Covid

In early May, Hine's Technical Sales Manager, Curtis Younkman and West Coast Sales Rep, Todd Smith, packed up their bags and headed out to the Long Beach Convention Center in California to attend this year's TechCon 2022. Coming off of the Covid pandemic, attendance was sparse but the event still managed 40+ booths, most of which were from the United States with a handful from overseas.

We were pleased to see at least four of Hine's current customers in attendance – Kurt J Lesker Company (KJL), Denton, Semicorp, and Angstrom. Sales Manager, Curtis, had the chance to meet with one of the KJL engineers and also with several of the other vendors, discussing upcoming orders and the challenges of the current supply chain issues.

Thanks to everyone who reconnected with us. We hope to see many of you at the next conference!

We're hiring. Know anyone who might be interested? Please send them this link! <https://hineautomation.com/careers/career-listings/>

We would love to hear your thoughts for our upcoming newsletters!

Thank you for following our emails for monthly updates on **semiconductor and robotic industry news, recent HA product launches**, and other helpful resources.

Are there certain topics you would like to see covered in a future Hine Automation newsletter? If so, please email us at news@hineautomation.com with your ideas.
